

# Visitors Enterprise

## Visitor management for the modern workplace

Our Enterprise Visitors plan is made for workplaces with complex compliance and security needs.

### Keep your workplace compliant and secure

Collect necessary information from visitors to meet ITAR, SOC2, GDPR or other compliance needs. Envoy automatically stores and backs up all your visitor data, so you can easily export it and make audits painless.

### Keep out intruders and unauthorized visitors

Create a custom block list and get notified instantly when guests don't meet your criteria to come on site. Rest assured that guests won't get a badge nor will their host get notified until an admin approves the visit.

### Securely share your office info with visitors

Create a great experience while safeguarding your company. Automatically send visitors your guest Wi-Fi or door access information when they sign in and end their access when they sign out.

### Features

- Create and screen visitors against your block list
- Check if visitors appear on third-party watch lists
- Check third-party restricted parties lists
- Scan IDs and record ID checks
- Automatically provision Wi-Fi details
- Connect multiple printers per location
- Track your settings changes in an activity log
- Access to a dedicated success representative
- Access control integrations
- Visitor screening integrations
- Building security integrations

“Enterprise security has a lot of challenges: people, property, and ideas. From a C-suite perspective, it’s important to think about solutions that add to this layered defense, and Envoy does so perfectly.”

**Lakshmi Hanspa**  
Chief Information Security Officer, Box
